?

## Feedback

## Providing industry intelligence in relation to VET priorities and workforce development needs for Western Australia.

The **Logistics & Defence Skills Council (LDSC)**, formerly the Logistics Training Council (LTC), is one of eight Industry Training Councils in Western Australia. As a vital conduit between industry and government (via the Department of Training and Workforce Development and the Office of the State Training Board) our role is to provide industry intelligence in relation to VET priorities and workforce development needs for the State. This includes bridging the gap between industry and government on identifying and implementing best practice workforce development solutions.

## Have your say!

We would like to hear from you regarding skills, workforce challenges, issues or opportunities within Western Australia.  
Contact us via (08) 9388 8781 or click the button below to find out how to join one of our Industry Working Groups (IWG).
